

How to introduce books

One of the most important skills your child will learn in life is being able to read.

And, most importantly, reading for pleasure. Reading plays a major role in communication; linking into listening, speaking, and writing, and it also stimulates creativity.

Our Book of the Week

Welcome to November

The days are getting colder and the nights are drawing in, a sure sign that Autumn is creeping upon us. This time of year is the perfect opportunity to get outside and the Foundation children have been exploring the vivid colours and exciting changes going on in nature. Lots of interesting and varied collection of goodies brought back in their bags.

Team Updates

Furlough Ends

Looking forward to the rest of our gang (staff team) returning to work, here are a few of the faces we have missed.

If you have any queries or questions please email Meg or Louise

Emergency Childcare

We thought you might like to know that we now offer emergency childcare to any child that has already attended the nursery. Covid has changed many routines and plans along with the every day challenges & trying to work. With covid guidelines making it almost impossible to rely on family, if you need extra childcare or even just a morning to have time for a cup of tea you know where we are!

Learning & Development

(Birth to 3 matters & Foundation Phase is our curriculum guidance)

What an awesome week we've had.....

Babies

-Sensory Play

Babies explored sensory play with melting insects in ice

A great sensory activity with cold items to explore the senses.

Toddlers

Toddlers had great fun this week being mini musicians

Exposing children to music during early development helps

them learn the sounds and meanings of words.

Pre-school children had great fun this week with their sensory play.

Research shows that sensory play builds nerve connections in the brain's pathways, which lead to the child's ability to complete more complex learning tasks. Sensory play supports language development, cognitive growth, fine and gross motor skills, problem solving skills, and social interaction.

COVID -19
If your child attends Caerleon nursery and you have tested positive for COVID-19, are suspected of having COVID-19 or are self-isolating, please email louise@caerleonchildcare.co.uk and do not enter the nursery.

Don't forget to follow us on facebook! We are sharing more and more great things that we get up to during our week at nursery. Why don't you leave us a review?

The MORE that you read,
the MORE things you will know.
The MORE that you LEARN,
the MORE places you'll go.
